

Bower Park School - ESSEX

Architect: **Walters and Cohen** Contractor: **Grangewood Builders Ltd**

Project Details

Having been heavily involved in the development of the **SSLD-3 standards for school washrooms**, it was only fitting that Grant Westfield should set the standard by supplying the 1st fully SSLD-3 compliant washroom.

Full height Doc M compliant emergency access cubicles along with personal space urinal cubicles ensure the required level of privacy. - The patented **System M** has a discreet and lockable emergency release feature. Services are easily accessed through the **Clipclad** ducts and wall lining, which integrate seamlessly with the bespoke vanity units and cubicles.

Possibilities

At Grant Westfield we are 100% behind the BSF campaign, and have the knowledge and expertise to manage turnkey projects. Complying with the regulations however; does not mean there is no room for identity within each washroom. Pupils can be involved in designing/featuring in digitally created wall panels, whilst contrasting cubicle doors and pilasters (DDA requirement) allow school colours to be featured.

Project Value - £25k
